

EVERYTHING YOU NEED TO KNOW
ABOUT

Jet Plasma

Jet Plasma pen

is a handheld plasma device that uses a cooler atmospheric temperature so does not create surface trauma like traditional fibroblast plasma. This extremely powerful device penetrates 13,000 volts of plasma through the epidermis, into the dermal and subcutaneous layers of the skin ***stimulating high levels of collagen and remodeling the cellular structure from the inside out.***

When Jet plasma is mixed with oxide oxygen, ozone is created which ***kills surface bacteria and is anti-inflammatory*** to aid in calming keratosis, eczema, and rosacea. Jet Plasma is used to ***tighten the skin, diminish wrinkles, diminish hyperpigmentation, treat acne, scarring, stretch marks*** and aids in product absorption that otherwise couldn't penetrate as deep without needle injection.

The Profosma Jet device uses a combination of Jet and Cold Plasma creating a strong low atmospheric plasma temperature on the skin.

Although you can ***see immediate improvement*** within one treatment, the skin will continue to improve at high levels of collagen regeneration over the next 6-8 weeks. ***Treatment can stay 3-5 years active in your skin.***

ONE DEVICE...ENDLESS POSSIBILITIES

- Eyelid Tightening
- Softens Frown Lines
- Softens Smile Lines
- Softens Crows Feet
- Softens Smokers Lines
- Softens Acne Scars
- Shrinks Pores
- Diminishes Aging Hands
- Reduces Pigmentation
- Lightens Skin
- Immediate texture improvement
- Increases product absorption
- and more...

BENEFITS INCLUDE

- No anesthesia necessary
- No downtime
- Procedure can be completed within 30 min
- No discomfort
- Sterilization of the skin
- Skin lightening
- Hyper pigmentation
- Anti-inflammatory
- Destruction of various bacteria, including p.acne
- Decreases pigmentation
- Decreases dark circles under the eyes
- Increases product absorption

PROCEDURES & DURATION

One session= of 15 minutes of Jet Plasma time & 15-30 minutes of skin preparation and aftercare

One Cycle = Three Sessions =
45 minutes Jet Plasma time

Procedures can be done every 48-72 hours.

Multiple Cycles can be done for even better results.
Although it is a pain-free treatment, it may feel slightly warm in some places.

IMPORTANT TO NOTE

It is important that no skincare products should be applied to the skin for 12 hours after the treatment.

Avoid strenuous exercise and applying make-up for about 12-24 hours, as with any other facial treatment

We recommend completing one Jet Plasma cycle and waiting 14 days before any other skincare procedures.
